

Congress of the United States
Washington, DC 20515

810

October 5, 2017

The Honorable Ajit Pai
Chairman
Federal Communications Commission
445 12th Street SW
Washington, D.C. 20554

Dear Chairman Pai:

We write in response to the Federal Communications Commission's (FCC's) request for comment in the recent Notice of Inquiry (NOI) "Concerning Deployment of Advanced Telecommunications Capability to All Americans in a Reasonable and Timely Fashion" (GN Docket No. 17-199). We are gravely concerned that the policies contemplated by this NOI could undo significant progress and investment by the FCC and Congress to ensure that all Americans have access to reliable, high-speed broadband. Specifically, we strongly oppose any proposal to lower speeds from the current standard of 25 Mbps download/3 Mbps upload to 10 Mbps download/1 Mbps or to find mobile broadband as a universally appropriate replacement for fixed, home broadband.

As you well know, reliable, high-speed broadband is essential to economic development, public safety, and a vibrant quality of life. Ensuring every home, school, and business has adequate access to the Internet is essential to unlocking the innovative potential of all Americans. However, as the annual section 706 broadband report demonstrates, our nation's rural and tribal communities continue to lag behind urban America and much of the developed world when it comes to broadband access, speed, and reliability. As the FCC has noted, thirty-nine percent of rural America and forty-one percent of those on Tribal land lack access to advanced broadband. The FCC has a statutory obligation to take steps to deploy broadband that supports high-quality telecommunications capability to all Americans in a reasonable and timely manner. The policy changes contemplated by this NOI would run counter to the intent of Congress by attempting to fulfill that statutory obligation through definitional changes, rather than concrete action to connect more Americans online. Simply moving the goalposts is not a policy solution, and weakening the definition of high speed internet is a disservice to the rural and tribal communities the FCC has an obligation to serve.

In particular, we are concerned with any effort to weaken the FCC's current policy finding that every American should have access to broadband services with speeds of at least 25 Mbps download/3 Mbps upload. Finding instead that only mobile service of 10 Mbps download/1 Mbps upload is sufficient would result in significantly slower and less reliable Internet access for millions of Americans, particularly those with low incomes or those living in rural and tribal communities. At this time, mobile access at 10 Mbps download/1 Mbps upload is not a reasonable replacement for fixed advanced broadband at home. This fact is well known to any child seeking to complete a homework assignment, small business owner hoping to develop an Internet presence, or individual completing an online job application or communicating with their doctor.

We strongly urge you to maintain the highest connectivity standards, which are critical to the FCC's statutory obligation to support high-quality telecommunications capability to all Americans.

Thank you for your consideration of these comments.

FEDERAL COMMUNICATIONS COMMISSION
WASHINGTON

OFFICE OF
THE CHAIRMAN

October 24, 2017

The Honorable Sanford D. Bishop
U.S. House of Representatives
2407 Rayburn House Office Building
Washington, D.C. 20515

Dear Congressman Bishop:

Thank you for your letter regarding the Thirteenth Section 706 Report Notice of Inquiry (Section 706 NOI). Your views are very important and will be entered into the record of the proceeding and considered as part of the Commission's review.

On August 8, 2017, the Commission adopted the Section 706 NOI, seeking public input on the most effective ways to complete the Commission's statutorily mandated task of determining whether advanced telecommunications capability is being deployed to all Americans in a reasonable and timely fashion. With respect to claims that the Section 706 NOI proposes to lower the current speed benchmark of 25 Mbps download and 3 Mbps upload (25 Mbps/3 Mbps) for fixed broadband, the item clearly proposes to *maintain* the 25 Mbps/3 Mbps standard for fixed broadband. The NOI also seeks comment on whether we should consider modifying that benchmark, and also asks if there are additional benchmarks we should include, such as data allowances, latency, or consistency of service. In addition, the Section 706 NOI seeks comment on how the inquiry can include an evaluation of both fixed and mobile services, and on a number of alternative approaches for how to incorporate the availability of mobile services in the Commission's evaluation under the statutory standard.

Moreover, while it is the policy of the Commission that extensions shall not be routinely granted, on September 5, 2017, the Wireline Competition Bureau and Wireless Telecommunications Bureau granted an extension for filing comments and reply comments in response to the Section 706 NOI. The Order found that an extension of the comment and reply comment deadline was appropriate in this case in order to allow interested parties additional time to analyze the technical, legal, and policy issues raised in this proceeding. However, given Section 706's congressionally mandated 180-day timeframe for completing the inquiry, a longer extension could have inhibited the Commission's ability to fully consider the record and meet its statutory obligations. Comments were due on September 21, 2017 and reply comments were by October 6, 2017. I can assure you that we will take into consideration the issues and concerns presented by all stakeholders in this important proceeding.

I appreciate your interest in this matter. Please let me know if I can be of any further assistance.

Sincerely,

Ajit V. Pai

Dear Senator Franken:

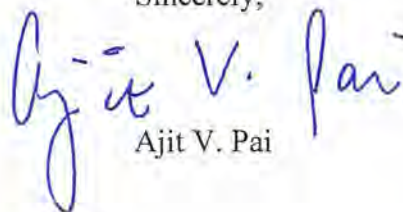

Thank you for your letter regarding the Thirteenth Section 706 Report Notice of Inquiry (Section 706 NOI). Your views are very important and will be entered into the record of the proceeding and considered as part of the Commission's review.

On August 8, 2017, the Commission adopted the Section 706 NOI, seeking public input on the most effective ways to complete the Commission's statutorily mandated task of determining whether advanced telecommunications capability is being deployed to all Americans in a reasonable and timely fashion. With respect to claims that the Section 706 NOI proposes to lower the current speed benchmark of 25 Mbps download and 3 Mbps upload (25 Mbps/3 Mbps) for fixed broadband, the item clearly proposes to *maintain* the 25 Mbps/3 Mbps standard for fixed broadband. The NOI also seeks comment on whether we should consider modifying that benchmark, and also asks if there are additional benchmarks we should include, such as data allowances, latency, or consistency of service. In addition, the Section 706 NOI seeks comment on how the inquiry can include an evaluation of both fixed and mobile services, and on a number of alternative approaches for how to incorporate the availability of mobile services in the Commission's evaluation under the statutory standard.

Moreover, while it is the policy of the Commission that extensions shall not be routinely granted, on September 5, 2017, the Wireline Competition Bureau and Wireless Telecommunications Bureau granted an extension for filing comments and reply comments in response to the Section 706 NOI. The Order found that an extension of the comment and reply comment deadline was appropriate in this case in order to allow interested parties additional time to analyze the technical, legal, and policy issues raised in this proceeding. However, given Section 706's congressionally mandated 180-day timeframe for completing the inquiry, a longer extension could have inhibited the Commission's ability to fully consider the record and meet its statutory obligations. Comments were due on September 21, 2017 and reply comments were by October 6, 2017. I can assure you that we will take into consideration the issues and concerns presented by all stakeholders in this important proceeding.

I appreciate your interest in this matter. Please let me know if I can be of any further assistance.

Sincerely,

Ajit V. Pai

The Honorable Tulsi Gabbard
U.S. House of Representatives
1433 Longworth House Office Building
Washington, D.C. 20515

Dear Congresswoman Gabbard:

Thank you for your letter regarding the Thirteenth Section 706 Report Notice of Inquiry (Section 706 NOI). Your views are very important and will be entered into the record of the proceeding and considered as part of the Commission's review.

On August 8, 2017, the Commission adopted the Section 706 NOI, seeking public input on the most effective ways to complete the Commission's statutorily mandated task of determining whether advanced telecommunications capability is being deployed to all Americans in a reasonable and timely fashion. With respect to claims that the Section 706 NOI proposes to lower the current speed benchmark of 25 Mbps download and 3 Mbps upload (25 Mbps/3 Mbps) for fixed broadband, the item clearly proposes to *maintain* the 25 Mbps/3 Mbps standard for fixed broadband. The NOI also seeks comment on whether we should consider modifying that benchmark, and also asks if there are additional benchmarks we should include, such as data allowances, latency, or consistency of service. In addition, the Section 706 NOI seeks comment on how the inquiry can include an evaluation of both fixed and mobile services, and on a number of alternative approaches for how to incorporate the availability of mobile services in the Commission's evaluation under the statutory standard.

Moreover, while it is the policy of the Commission that extensions shall not be routinely granted, on September 5, 2017, the Wireline Competition Bureau and Wireless Telecommunications Bureau granted an extension for filing comments and reply comments in response to the Section 706 NOI. The Order found that an extension of the comment and reply comment deadline was appropriate in this case in order to allow interested parties additional time to analyze the technical, legal, and policy issues raised in this proceeding. However, given Section 706's congressionally mandated 180-day timeframe for completing the inquiry, a longer extension could have inhibited the Commission's ability to fully consider the record and meet its statutory obligations. Comments were due on September 21, 2017 and reply comments were by October 6, 2017. I can assure you that we will take into consideration the issues and concerns presented by all stakeholders in this important proceeding.

Dear Congresswoman McCollum:

Thank you for your letter regarding the Thirteenth Section 706 Report Notice of Inquiry (Section 706 NOI). Your views are very important and will be entered into the record of the proceeding and considered as part of the Commission's review.

On August 8, 2017, the Commission adopted the Section 706 NOI, seeking public input on the most effective ways to complete the Commission's statutorily mandated task of determining whether advanced telecommunications capability is being deployed to all Americans in a reasonable and timely fashion. With respect to claims that the Section 706 NOI proposes to lower the current speed benchmark of 25 Mbps download and 3 Mbps upload (25 Mbps/3 Mbps) for fixed broadband, the item clearly proposes to *maintain* the 25 Mbps/3 Mbps standard for fixed broadband. The NOI also seeks comment on whether we should consider modifying that benchmark, and also asks if there are additional benchmarks we should include, such as data allowances, latency, or consistency of service. In addition, the Section 706 NOI seeks comment on how the inquiry can include an evaluation of both fixed and mobile services, and on a number of alternative approaches for how to incorporate the availability of mobile services in the Commission's evaluation under the statutory standard.

Moreover, while it is the policy of the Commission that extensions shall not be routinely granted, on September 5, 2017, the Wireline Competition Bureau and Wireless Telecommunications Bureau granted an extension for filing comments and reply comments in response to the Section 706 NOI. The Order found that an extension of the comment and reply comment deadline was appropriate in this case in order to allow interested parties additional time to analyze the technical, legal, and policy issues raised in this proceeding. However, given Section 706's congressionally mandated 180-day timeframe for completing the inquiry, a longer extension could have inhibited the Commission's ability to fully consider the record and meet its statutory obligations. Comments were due on September 21, 2017 and reply comments were by October 6, 2017. I can assure you that we will take into consideration the issues and concerns presented by all stakeholders in this important proceeding.

I appreciate your interest in this matter. Please let me know if I can be of any further assistance.

Sincerely,

Ajit V. Pai

On August 8, 2017, the Commission adopted the Section 706 NOI, seeking public input on the most effective ways to complete the Commission's statutorily mandated task of determining whether advanced telecommunications capability is being deployed to all Americans in a reasonable and timely fashion. With respect to claims that the Section 706 NOI proposes to lower the current speed benchmark of 25 Mbps download and 3 Mbps upload (25 Mbps/3 Mbps) for fixed broadband, the item clearly proposes to *maintain* the 25 Mbps/3 Mbps standard for fixed broadband. The NOI also seeks comment on whether we should consider modifying that benchmark, and also asks if there are additional benchmarks we should include, such as data allowances, latency, or consistency of service. In addition, the Section 706 NOI seeks comment on how the inquiry can include an evaluation of both fixed and mobile services, and on a number of alternative approaches for how to incorporate the availability of mobile services in the Commission's evaluation under the statutory standard.

Moreover, while it is the policy of the Commission that extensions shall not be routinely granted, on September 5, 2017, the Wireline Competition Bureau and Wireless Telecommunications Bureau granted an extension for filing comments and reply comments in response to the Section 706 NOI. The Order found that an extension of the comment and reply comment deadline was appropriate in this case in order to allow interested parties additional time to analyze the technical, legal, and policy issues raised in this proceeding. However, given Section 706's congressionally mandated 180-day timeframe for completing the inquiry, a longer extension could have inhibited the Commission's ability to fully consider the record and meet its statutory obligations. Comments were due on September 21, 2017 and reply comments were by October 6, 2017. I can assure you that we will take into consideration the issues and concerns presented by all stakeholders in this important proceeding.

I appreciate your interest in this matter. Please let me know if I can be of any further assistance.

Sincerely,

Ajit V. Pai

OFFICE OF
THE CHAIRMAN

October 24, 2017

The Honorable Paul Tonko
U.S. House of Representatives
2463 Rayburn House Office Building
Washington, D.C. 20515

Dear Congressman Tonko:

Thank you for your letter regarding the Thirteenth Section 706 Report Notice of Inquiry (Section 706 NOI). Your views are very important and will be entered into the record of the proceeding and considered as part of the Commission's review.

On August 8, 2017, the Commission adopted the Section 706 NOI, seeking public input on the most effective ways to complete the Commission's statutorily mandated task of determining whether advanced telecommunications capability is being deployed to all Americans in a reasonable and timely fashion. With respect to claims that the Section 706 NOI proposes to lower the current speed benchmark of 25 Mbps download and 3 Mbps upload (25 Mbps/3 Mbps) for fixed broadband, the item clearly proposes to *maintain* the 25 Mbps/3 Mbps standard for fixed broadband. The NOI also seeks comment on whether we should consider modifying that benchmark, and also asks if there are additional benchmarks we should include, such as data allowances, latency, or consistency of service. In addition, the Section 706 NOI seeks comment on how the inquiry can include an evaluation of both fixed and mobile services, and on a number of alternative approaches for how to incorporate the availability of mobile services in the Commission's evaluation under the statutory standard.

Moreover, while it is the policy of the Commission that extensions shall not be routinely granted, on September 5, 2017, the Wireline Competition Bureau and Wireless Telecommunications Bureau granted an extension for filing comments and reply comments in response to the Section 706 NOI. The Order found that an extension of the comment and reply comment deadline was appropriate in this case in order to allow interested parties additional time to analyze the technical, legal, and policy issues raised in this proceeding. However, given Section 706's congressionally mandated 180-day timeframe for completing the inquiry, a longer extension could have inhibited the Commission's ability to fully consider the record and meet its statutory obligations. Comments were due on September 21, 2017 and reply comments were by October 6, 2017. I can assure you that we will take into consideration the issues and concerns presented by all stakeholders in this important proceeding.

I appreciate your interest in this matter. Please let me know if I can be of any further assistance.
